

Dear alumni,

Rio Tinto Exploration will offer again Summer Placements to students, like previous years. and even if we have low volumes. Clemence Bataille will be in charge of these recruitments.

Students can apply directly on the website through the following link:

<https://riotinto.taleo.net/careersection/4/jobdetail.ftl?lang=en&job=LON0002G>

The closing date for applications is: January 31st.

Locations for those Summer Placements will be: South Africa, DRC, Kazakhstan.

Kind regards,

Hans de Ruiter

A flyer for Rio Tinto's 2010 Summer Placement Opportunities. The background is a photograph of a dirt road in a dry, open landscape with a white SUV parked on the side. The Rio Tinto logo is written vertically in large red letters on the left side. The text on the right provides details about the program, including the number of placements, locations (South Africa, DRC, Kazakhstan), and the closing date of January 31st, 2010. It also includes the application website and job reference number.

2010 Summer Placement Opportunities

Exploration's Africa Europe Region is offering a limited number of Summer Placements for the 2010 field season. These 8-10 week placements are based at an exploration project starting in early July. Locations will South Africa, DRC, Kazakhstan. Successful applicants will work closely with Exploration geologists carrying out routine exploration tasks such as assisting with drilling operations; logging core or RC chips, working on geochemical or geophysical surveys, prospect mapping and other early stage grassroots exploration activities.

Competition for places on the Summer programme is generally keen with a typically high level of over-subscription. Placements are aimed at students in their penultimate year of study and are timed to coincide with the summer vacation. The most important criteria used for selection is enthusiasm for field work and an interest in the mining industry.

This Summer Placement Programme Scheme is an essential part of Rio Tinto Exploration's recruitment strategy, used for identifying and retaining high calibre exploration geologists. The scheme has resulted in a pool of successful explorers and management staff and is considered a competitive advantage over traditional recruitment methods.

The closing date for the 2010 Summer Placement Programme is 31st January 2010
