Mining Technology in Boliden seeks

Mine Planning Engineer

to exciting projects and improvement work for Boliden's mine production

Mining Technology Department works together with Boliden's mines with development and production support to strengthen Boliden's position as a competitive mining company. Technology areas are mine design with regard to rock mechanics and infrastructure, mine planning, production control, production technology and quality assurance. The Mining Technology department seeks a mining engineer with strong interests in production, mine planning and development.

- Mine planning works with CAD, optimization and planning tools to produce mining sequences on a yearly and weekly basis.
- Within production control we work with computer support to estimate, plan, control, follow and quality assure the production in real time.

Tasks

The work is carried out in close cooperation with Bolidens' mines both as projects and as technique resources on site. Your main tasks will be to work with projects and technical support within mining technology department and the Boliden mines. You will carry out the projects in close cooperation with the mines own personnel, co-workers at Technology Department and external consultants. The work includes standardising the planning processes and controls. Your employment site is located in Boliden, but as the projects are carried out at our operations travel is expected.

Education and experience

You have civil/mining engineer with some years production experience within the mining industry. As much of the work is carried out with modern computer tools as CAD/Microstation and planning systems the experience of such is desirable.

Knowledge of data bases, project work, mine surveying, DMAIC-six sigma and production control systems and experience of software such as DESWIK, CAD and Datamine are also merited. The work requires that you can express yourself in both spoken and written Swedish and English. You should also have good analytical abilities, a methodical way of working and good social skills. Driving license class B is required.
