

# Mine of the Future™

## Driving Forward Thinking.

At Rio Tinto, we are driving forward thinking through advanced technology that will change the future of mining.

This truly will be the next generation and Rio Tinto is committed to achieving success and changing the mining industry definitely.

At Rio Tinto iron ore, we have opportunities available in the Mine of the Future™ projects team.

This team is tasked with the deployment and sustainable integration of stepchange mining technologies throughout its Western Australian mining operations.

We are currently recruiting for the Yandicoogina Mine of the Future™ implementation and have opportunities available in the following disciplines:

- Mining Engineering
- Project Engineering
- Equipment Performance & Application Engineering
- Drill & Blast Engineering
- Maintenance & Reliability Engineering
- Business & Technology Integration
- Risk & Change Management
- Safety & Training

These roles range from Advisor to Manager level, either based in Perth or on a fly-in-fly-out roster. For more information and to apply, visit our careers website searching for PER002RI.
