

Outotec in brief

Madeleine Scheidema
Valentina Liski

Outotec

Four business areas providing sustainable solutions

Non-ferrous Solutions

For processing copper, nickel, zinc, lead, gold, silver and platinum group metals in the entire value chain from ore to metal

Ferrous Solutions

For processing iron ores and other ferriferous materials in the entire value chain from ore to metal

Energy, Light Metals and Environmental Solutions

For sulfuric acid production, off gas handling, alumina refining, roasting, calcining, biomass processing, oil shale & oil sands processing and industrial water treatment

Services for a plant's entire lifetime

Examples of benchmark technologies

- Half of the world's pyrometallurgical primary copper is produced with Outotec® Flash Smelting
- One-third of the world's hydrometallurgical copper is produced with Outotec® SX-EW
- Over a third of the world's sulfuric acid capacity runs on Outotec technology
- Most of the world's iron ore pellets are produced using Outotec's traveling grate process
